560 Kirks Blvd, Suite 116
Troy, MI 48084
PROJECT MANAGER Sonia Beshay
COMPLETED September 2003

SCOPE OF PROJECT

This project included the construction of a 27,000 square foot, two-story sanctuary and classroom facility. The architectural design is the highlight of this facility with the highest quality masonry products and services. This was a unique project in that construction was phased as funds became available from the church. This meant our management team had to remain proactive and timely when scheduling both subcontractors and materials so as not to incur any extra costs. Our ability to work with the church's building committee and congregation allowed successful on time completion of this project.

AWARDS

In May 2005, the Masonry Institute (MIM), in cooperation with the American Institute of Architects (AIA) Michigan presented an award to Sorensen Gross Construction Services (SGCS) for excellence in Masonry Design.
